

SAFETY TRAINING COURSE

MEWP Combo

DURATION

1 day

VALIDITY

3 years

PRICE

\$450

FORMAT

In-person

PRIVATE CLASS SIZE

4 to 8

MEWP Combo is a 1-day course for operators of mobile elevating work platforms, boom lifts and scissor lifts. You learn the standards and OHS requirements that apply, the terrain types, the parts of a machine, and what the operator's manual, data plate and decals tell you. You learn what affects stability and how to operate safely, including fall protection, controls, emergency planning and troubleshooting. You inspect the work area and the machine, check its functions, and complete a practical evaluation. Certification takes a theory test and a practical.

STANDARDS

CAN/CSA-B354.8:17, Operator (Driver) Training

CAN/CSA-B354.7:17, Safety Principles, Inspection, Maintenance and Operation

Course modules**01 Introduction**

Standards and OHS Regulation · Terrain types · Anatomy of a MEWP · Preventative inspections and tests

02 Manufacturer-Specific Information

Operator's manual · Markings

03 Stability

Definitions · Four stability factors

04 Safe Operation

Fall protection · MEWP controls · MEWP passenger orientation · Emergency planning · Troubleshooting · Hazard discussion activity

Practical activities**Workplace inspection**

Inspect the work area with a hazard checklist: drop-offs, floor obstructions, sloped or slippery surfaces, overhead obstructions and power lines, weather, unauthorized personnel and vehicle traffic.

Pre-use inspection

Inspect the machine before use on the check sheet for a boom lift or a scissor lift: manual, decals, wiring, leaks, fluid levels, tires, battery, guardrail and stabilizers.

Pre-use function checks

Test the ground controls and the platform controls on the same check sheet, including the emergency stop and the auxiliary lowering.

MEWP operator competency evaluation

A practical evaluation of start-up, travel, elevating, lowering and shutdown skills. The evaluator marks each skill safe, unsafe or not applicable.
